From a Distance

2020.2021 Annual Report

A Year in Review

Whirlwind. That is how I would describe our last year. There were so many unknowns when we started our new fiscal year in July 2020. We did not know the schools' plans for programming, we had no idea if some of our funders would eliminate or reduce their funding due to the continuing pandemic, and we were not sure if we would need to furlough staff due to these unknowns. Thankfully, none of these things happened and we adapted seamlessly throughout the year, in large part because of our history in providing live Distance Learning (DL) from our green-screen rooms and the support of our donors.

When the school year started in August, we were inundated with requests for live DL. With only two DL studios, we knew we would need to add more to meet the requests for this format of programming. Through the generosity of the McMillen Foundation and the Lilly Endowment Youth Program Resilience Fund, we were able to add four mobile green-screen rooms. This allowed our educators to serve 37,594 children and adults via live DL, which is a 697% increase from our 2019.2020 year! We also learned we could serve up to 400 individual connections at one time, allowing up to 400 students learning from home to connect to a single program all at once! We discovered this ability when we provided our "I Need My Teeth" virtual school assembly to 397 K-2nd graders who were all learning from home in Detroit and Cincinnati.

We are beyond thankful for our donors and funders who aided in our success over the last year. Our donors went above and beyond through our first peer-to-peer fundraiser, increasing our donor base with 84 new donors and our online giving from .03% to 84%. We would not have been able to get through the last year without working together to ensure preventive health education continues throughout the pandemic.

Thank you for allowing McMillen Health to serve students of all ages, abilities, and backgrounds throughout Indiana and beyond with preventive health education and the following special projects.

Building

Adding Green!

In the last year, we have added some green to our building, but not the kind you find outdoors. We added four additional green-screen rooms to accommodate the 1,381 requests for live DL programming. In a typical year, we receive roughly 225 requests for live DL. With students learning remotely and at school, there was a need for more DL than ever before. We served 37,594 students through live DL in the last year, making it a recording-breaking year for live DL. Thank you to the McMillen Foundation and the Lilly Endowment Youth Program Resilience Fund for making this possible.

Making Use of Space

With the need for additional space for green-screen rooms, we decided to turn our former inventory room into a multipurpose room. This allowed the room to be used for programming, a DL studio, lunch overflow, and a decompression room for any of our guests experiencing overstimulation. In the last year, the multipurpose room has been used 83 times reaching 1,601 students. Before the conversion, the room was sitting empty as our inventory is now stored off-site. The room required renovations to be used as a multipurpose room. A special thank you to the Journal Gazette Foundation and the McMillen Foundation for making this room possible.

New Displays

Visiting McMillen Health's Great Hall looks a little different, as a new bike display has been added to illustrate the benefits of exercising. Purdue University Fort Wayne received funding from I&M and the AEP Foundation to support STEAM education, which teaches science, technology, engineering, arts, and math to middle and high school students. The electric stationary bike display will be used to teach the importance of physical and emotional health.

We inherited some displays from the Robert Crown Center for Health Education, now Candor Health, when they closed their facility in 2017. The displays have been waiting for some TLC to bring them back to life. We were able to revive the large brain display that now adorns our Great Hall wall thanks to funding from the AWS Foundation. The display illustrates the impact of trauma on the brain. Three videos were developed to play inside the brain's TV to explain social-emotional health, child sexual abuse, and how trauma can impact one's overall health.

Oh Snap! New
interactive
programs and
displays.

Programs

McMillen Health's professional health educators stayed busy this past year, adapting 85% of our programs to a live DL format, learning how to use new green-screen studios, developing training videos for each of our programs, and developing new programs to address COVID-19 and mental health.

COVID-19 Programs: Be a Germ Genius for grades K-2, Coping with COVID for grades 3-5, Going Viral for grades 6-12, and Conquering COVID for adults. Each program reviews the importance of regular handwashing, explains a pandemic, and teaches the importance of maintaining a positive attitude to support mental health.

Mental Health Programs: Mood Monsters for grades K-2, Hooked on a Feeling for grades 3-5, Mind-Full of Stress for grades 6-8, Social-Emotional Smarts for grades 9-12, and Keys to Happiness for adults. Each of these programs reinforces positive relationships, how stress impacts the mind and body, and its role in social and emotional health.

Additional Programs

Dunk the Funk for grades 6-8 educates students on the importance of daily hygiene habits including handwashing, showering, dental hygiene, skincare, clothing care, nail care, and menstrual hygiene practices

Fall Prevention for adults allows students to discover the risk factors that can contribute to falls by completing a Falls Self-Assessment. They learn about physical and environmental factors that can increase the risk of falling.

We also now provide more than 52 programs for children and adults with disabilities. We have adapted many of our traditional programs for our annual Varied Abilities Days thanks to the generosity of the AWS Foundation.

Virtual Varied Abilities Days

We provided our fourth year of Varied Abilities Days virtually to ensure children and adults of all abilities received preventive health education. Seventy-two (72) programming sessions were provided to 825 children and adults over 14 days, and 326 staff and caregivers also participated in programming. This project has been graciously supported by the AWS Foundation, who recognizes the need for vital, effective preventive health education for students of all abilities and ages.

Teen Pregnancy Prevention (TPP) Programming Expansion

Since 2015, we have provided pregnancy prevention education to 1,500 Indiana youth in grades 6-8. Programming includes our own promising practice *Choices Today, Options Tomorrow* (CTOT) and the evidence based *Promoting Health Among Teens* (PHAT). Both curricula has been generously funded by the Indiana Department of Health.

In 2020, we received additional funding to provide the evidence-based program *Botvin Lifeskills Training* for Transitions and *Botvin Lifeskills Training* for High School throughout Blackford, Elkhart, and Jay counties. Through this expansion of programming, we served 174 youth with the six-module curriculum and 42 youth through #WoWTalk Cafés for teens developed through the Youth Thrive Framework. Over the next year, we will be expanding our reach again to serve Fulton, Kosciusko, and Saint Joseph counties with *Botvin* and #WowTalk Cafés for teens and parents. These projects have been made possible by the Indiana Department of Health.

To learn more about this project visit: mcmillenhealth.org/curriculum/botvin-lifeskills

Virtual “I Need My Teeth” Assemblies

We took the “I Need My Teeth” Assembly virtual over the last year. This new format allowed us to provide 65 virtual assemblies reaching 5,961 youth in grades Preschool-2 throughout rural Ohio, Indiana, and the Upper Peninsula of Michigan! By providing the assembly virtually, students learning remotely in all three states were able to view the program at home with parents and caregivers. We were able to see parents dancing with their children in kitchens, siblings singing along to the songs, and teachers relieved that their students were so engaged. This was the first year we were able to evaluate children’s toothbrushing behavior changes as a result of the assembly. Parent evaluations showed 58% of children liked to brush their teeth more and 45% of children had improved their attitudes towards brushing as a result of the assembly.

We would like to thank the Delta Dental Foundation of Michigan, Ohio, Indiana, and North Carolina for making this project possible. Their support has been instrumental for the Brush program.

Special Projects

Our Director of Curriculum Development and Creative Services Department have been busy this last year with the following special projects:

Care During COVID-19 for Neighborhood Health

We worked to develop educational resources for Neighborhood Health in Fort Wayne to inform their patients about the COVID-19 pandemic. Resources included a series of short videos, text messages, clinic posters, rack cards, social media graphics, and content. All resources were translated to Spanish and Burmese with culturally appropriate content to serve audiences of all backgrounds.

Smart Smiles Curricula for the Delta Dental Foundation of Virginia

As we continue to work with the Delta Dental Foundation of Michigan, Ohio, Indiana, and North Carolina, we are becoming recognized among the other Delta Dentals as well! We spent several months redeveloping Delta Dental of Virginia's Smart Smiles curricula for grades K-2 and 3-5 to be used digitally. This project focused on redeveloping a tangible kit set, which was mailed to locations, to an all-digital version of the curricula. Lessons were modified to work in a remote learning setting if needed. Resources developed included short videos to accompany lessons, a training video for teachers using the curricula, K-2 Smart Smiles Oral Health Curriculum, and 3-5 Smart Smiles Oral Health Curriculum.

Redevelopment of Brush Curriculum for Riverside County Department of Public Health in California

In 2019, 2020, we worked with the Sacramento County Department of Health to redevelop our Brush oral health resources for children with disabilities. In doing so, our work was shared with other organizations throughout California. In 2020, the Riverside County Department of Public Health partnered with us to redevelop 12 Brush lessons into digital lessons for parents and caregivers to complete at home during the COVID shutdown; 12 caregiver handouts, and 5 how-to videos for caregivers. All resources were provided in English and Spanish.

Michigan Oral Health Needs Assessment for Adults with Disabilities

Over the years of providing our Brush Oral Health Program, we have seen and heard the oral health disparities for those living with a disability. We partnered with Project Accessible Oral Health out of New York to conduct an oral health needs assessment for adults with disabilities throughout the state of Michigan. The needs assessment included 22 personal interviews, three focus groups, and the participation of 13 professionals serving adults with disabilities. The results of the report illustrate the need for rural dentists who serve people with disabilities and accept Medicaid reimbursement, more education for dentists and hygienists about various disabilities and adaptations, a better understanding of serving individuals with disabilities, and educational materials for use at home by caregivers and individuals with disabilities on the importance of oral health and how to make it possible. This project was made possible by the Dental Dental Foundation of Michigan, Ohio, Indiana, and North Carolina.

We want to hear from you!

If you are a dental professional and:

- Serve patients in Michigan
- Serve individuals with disabilities
- Have thoughts about dental care for people with disabilities

YOU MAY BE ABLE TO TAKE PART IN A VIRTUAL FOCUS GROUP AND/OR INTERVIEW!

For more information: contact Megan Wilkinson mwilkinson@mcmillenhealth.org (260) 456-4511 x 331

Each person interviewed will receive a \$50 gift card for participating in this project. Schedule today!

Project Accessible ORAL HEALTH

Enhancing the Wellness of People with Disabilities

DELTA DENTAL FOUNDATION

Healthy Tomorrow App

In December 2020, we received the final funding necessary to begin the development of an app for pregnant or recently pregnant women with opioid use disorder (OUD) and their babies being born with neonatal abstinence syndrome (NAS). We have been hoping for this project to begin since the [In Her Words](#) community-wide report was completed in 2018. The report found women with OUD and the professionals serving them desired low-literacy education on OUD, NAS, and other topics with a preference for education to be provided in video format and easily accessible from their phones. From there, the idea for the app began.

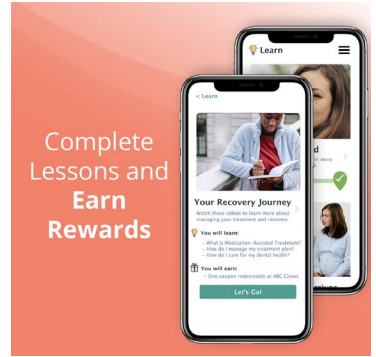

Through the generosity of the St. Joseph Community Health Foundation, the PHP Foundation, the Schneider Foundation, the English-Bonter-Mitchell Foundation, and the Delta Dental Foundation of Michigan, Ohio, Indiana, and North Carolina, we were able to begin this five-year project. Two advisory groups were established in early March 2020, the Professional Advisory Group (PAG) and Mom's Advisory Group (MAG). The PAG consists of 20 professionals throughout Allen County who serve pregnant or parenting women with OUD and their babies born with NAS. The MAG is composed of moms who were interviewed for the *In Her Words* report, or have been identified by a professional from the PAG as a pregnant or parenting mom with OUD.

Over the last six months, we have developed 20+ videos, a Professional Guide, and content for the app. We have worked with InfiniTeach out of Chicago to develop the app design and layout. The app is scheduled to launch on November 1, 2021, and we would like you to be part of the launch! Please consider downloading the Healthy Tomorrow app for free from Apple or Google and sharing it with those you may know who have been impacted by the opioid epidemic.

Over the next year, we will be piloting the app with 300 Allen County women and 25 professionals. Women using the app can earn badges by completing a pre- and post-test for each category of videos. The badges can then be redeemed at A Baby's Closet for diapers, wipes, car seats, and other items.

A key portion of this app is the discussion forum and professional portal. An additional \$30,000 is required to develop these features. The discussion forum will allow women using the app to connect with other women walking the same path. The professional portal will allow women to give professionals access to verify their progress in earning badges. Professionals include home visitors, physicians, peer support specialists, OBGYNs, and more. The key to this project is to connect these women with a home visitor who will help them in their journey to maintaining a healthy lifestyle for them and their baby.

This is a five-year project with the first two years focusing on the app development, discussion forum, professional portal, and OUD/NAS. The following three years' additional content will be developed on prenatal health and safe sleep, tobacco use during pregnancy, and nutrition and breastfeeding. Further content will be developed as needed.

To learn more about the app project please visit: mcmillenhealth.org/healthy-tomorrow

Ready for a healthier tomorrow for you and your baby?

Healthy Tomorrow
The App Inspired By You And Created For You!

The Healthy Tomorrow™ app partnered with professionals serving women just like you to answer questions you might have if you have used opioids during your pregnancy.

20+ Educational Videos To Learn About:

- Caring for yourself and your baby during pregnancy
- What to expect at the hospital
- What to know after taking your baby home
- How to build a support network
- Your mental health during and after pregnancy

Expanding Brush Resources

Our Brush Oral Health Program saw a few additions in the last year to continue serving vulnerable populations with oral health education:

Adult oral health resources were developed in partnership with the University of Michigan's Dental School and Depression Center to begin serving adults with chronic health conditions. Our new partnership allowed an oral health flip chart, 8 videos, and 13 informational handouts to be developed. The resources are being shared with organizations who have peer-support specialists and community health workers. Those receiving resources participate in a two-hour oral health training and practice motivational interviewing techniques as shared in the flip chart. This project was made possible through funding from the Delta Dental Foundation of Michigan, Ohio, Indiana, and North Carolina.

DELTA DENTAL FOUNDATION

Digital Brush Oral Health Curriculum was developed for preschool classrooms serving children ages 3-5 remotely. Fifteen of our most popular Brush lessons were redeveloped for caregivers to provide oral health education to their children while at home during COVID closures. Head Starts across the nation were requesting digital caregiver lessons so they could continue to reinforce the need for daily toothbrushing. We responded by developing a digital curriculum with 5 how-to caregiver videos and digital access to our two most popular children's books, *I Brush My Teeth* and *Happy Teeth!* This project was made possible by the Foundation for Dental Health Education (FDHE).

Digital Brush Early Learning Curriculum was developed for early childhood educators and home visitors serving children ages birth to 2. This new 12 lesson digital oral health resource includes 6 engaging classroom lessons and 6 caregiver lessons to be completed at home. Lessons help children explore emotions and how they relate to oral health. Children practice motor skills necessary for toothbrushing. This new digital resource also features 12 digital caregiver handouts, two mirror clings, and digital access to our two most popular children's books, *I Brush My Teeth* and *Happy Teeth!* This project was made possible by PNC's Grow Up Great Fund and the Isaac Knapp Dental Education Foundation.

Lights, camera, action! The Brush program serves all 92 Indiana counties!

Events

Virtual Vitality Awards

McMillen Health took the Vitality Awards virtual in 2020, allowing our guests to view a prerecorded program as we were unable to gather in-person. The Vitality Awards honor the silent heroes in our community who are making a difference in the areas of health education, wellness, prevention, and healthcare. The business category recognizes businesses striving to make a difference in one of these categories. Award recipients for the 2020.2021 year: Dan Krleski of East Allen County Schools, Health Education; Jessie Brumbeloe retired nurse, Wellness; Wendy Spitznagel of YMCA of Greater Fort Wayne, Prevention; Dr. Tina Sheehan of Give Hear, Healthcare; Mental Health America of Northeast Indiana, Business. The evening also celebrates the Pat Parker Award recipient, which is someone who goes above and beyond in one or more of those categories. In 2020, we recognized all healthcare and frontline workers for the Pat Parker award and it was accepted by former Allen County Health Commissioner Dr. Deborah McMahon.

We would like to thank our sponsors who made this event possible: Aging and In-Home Services; Current Mechanical; Findley Financial; Haines, Isenbarger, and Skiba, LLC; Jackson Group; Main Stay Solutions; Neiert Insurance; Northwestern Mutual; PHP; PNC; and St. Joseph Community Health Foundation.

Peer-to-Peer Fundraiser

We partook in our first peer-to-peer fundraiser in March 2021, which resulted in 92 donors giving to the campaign, 84 of whom were new donors, and \$5,141 being raised to support 140 youth receiving preventive health education! We were so impressed with these results that we will be holding another peer-to-peer fundraiser in the Spring of 2022. We cannot thank you enough for making our work possible and for supporting our efforts in educating youth to live a healthy tomorrow. Your support allowed our online giving to grow by 83.87%! This has been a goal for the organization for more than three years, and thanks to you this goal was achieved. We appreciate you!

Inaugural Tee Off with TAM Golf Outing

We held our first Tee Off with TAM on June 25, 2021, at Whispering Creek Golf Course in New Haven. It was a very rainy day for the golf outing. Despite the rain, a great time was had by all, and we had 15 teams participate in this inaugural event. We would like to thank our sponsors who made this event possible: MainStay Solutions our Title Sponsor; B2B CFO; Baden, Gage, and Schroeder; Blackburn and Green; Code Chameleon; Delta Dental of Indiana; Digital Wolf LLC; Findley Financial; First Fedreal Savings of Huntington; Haines, Isenbarger, and Skiba LLC; Hallmark Home Mortgage; Harmony Marketing; Keith Harrison Cosmetic Dentist; Lane 201 Botique; Maureen Widner; Neiert Insurance; Northwestern Mutual; Osage Lane; PHP; Saratoga; Stepstone Youth and Family Services, and Strahm Building Solutions.

2020-2021 Income & Expenses

Income

- Admissions = \$125,423
- Brush Oral Health Program = \$138,499
- Grants & Donations = \$860,310
- Contracted Work = \$435,398
- Investment Income = \$497,903
- Special Events = \$29,631
- Other = \$2,403

Expenses

- Program Services & Health Education = \$913,608
- Management & General Expenses = \$276,499
- Development Expenses = \$71,526

Going the Distance

McMillen Health continues to expand its footprint throughout the state of Indiana. In the last year, our expansion included Blackford, Elkhart, Fulton, Jay, and St. Joseph counties. As we continue to go the distance with live DL, we are building new relationships with schools we have never served before. Our goal over the next three years is to continue expanding our footprint in Indiana, as well as nationally. In 2020.2021 our student reach in northeast Indiana follows:

- Allen 30,870
- Adams 1,723
- Blackford 181
- Dekalb 3,190
- Elkhart 520
- Fulton 166
- Grant 788
- Huntington 1753
- Jay 69
- Kosciusko 7,426
- LaGrange 1,838
- Noble 3,754
- St. Joseph 367
- Steuben 1,029
- Whitley 141

Reaching these students would not have been possible without your support. In 2020.2021, McMillen Health provided 2,088 preventive health education programming sessions reaching 64,830 students of all ages, abilities, and backgrounds. Just over 55%, or 35,780, of these students received programming at no cost through the generosity of our donors and funders just like you. We thank you on behalf of the students we serve every day. Without you, these students would not have received preventive health education as their schools could not afford to provide this education to them, nor could they ask the parents to cover the cost during a pandemic when many were without jobs.

If you would like to help additional students who are unable to pay the \$5 fee to receive programming, consider making a contribution to the Parker Scholarship which covers the cost of these students. When schools request programming but can only cover the cost of a portion of their students, we use the Parker Scholarship to cover the cost of the remaining students. Your contribution will allow students from all over Northeast Indiana to receive education today, for a healthy tomorrow.

Giving to the Parker Scholarship is easy, just click on our donate page and select Parker Scholarship: <https://bit.ly/2WJLion>
