Our Educators Linda Hathaway, David Ward and Debbie Harvey discuss new technology.

Interactive Video Conferencing
- Here: 27%
- There: 50%
- Everywhere: 23%

Field Trips
33 states and four Canadian provinces reached since 2006.

The new Interactive Video Conferencing (IVC) studio features Chroma Key (green screen) technology, increasing our video capabilities.

Educator David Ward in front of the green screen.
The McMillen Center for Health Education educates youth and adults from around the country and into Canada. Our education includes field trips, outreach education and interactive video conferencing. Almost half of the students we educate are within an hour of Fort Wayne. Since opening in 1981, more than 1.6 million students have learned about their amazing bodies.

In preparing to better meet the needs of schools, teachers, and nonprofits across the country, we received a generous grant from the McMillen Foundation to install a new, state-of-the-art Chroma key studio in one of our teaching theaters. This transformation furthers the capabilities of the McMillen Center into the next generation of tech-enabled teaching.
We presented our Brush! Program at the National Oral Health Conference and Head Start in Washington D.C.

Brush! has reached 268 preschool teachers and 1882 students.

Family Table has 40 collaborative partners, including FWCS, EACS, Lutheran Health Network and Associated Churches.
TWO OF OUR ACTIVE HEALTHY FAMILY VIDEOS WERE BROADCAST ON LONDON’S COMMUNITY CHANNEL AS PART OF THEIR “LIVING IT UP” SERIES REACHING 37,000 VIEWERS.

Programs such as Active Healthy Families, Brush! Dental Curriculum and the Family Table project are making a distinct difference in our community. These programs extend the McMillen Center’s mission in new and exciting ways! Through the Family Table project, families are encouraged to eat together for benefits including better grades, bullying prevention, less teen pregnancy, lower usage of tobacco and other drugs, and better nutrition. Active Healthy Families gives parents, caregivers and day care providers information about making better meal choices. Through the Brush! Dental program, children ages birth to 5 and their parents are being educated about the importance of primary (baby) teeth and how oral health relates to school success.

Bethany Clapper works with donors to meet the goals of the center.
The success of the McMillen Center continues to be cultured from the generous support we receive from donors, including local and national foundations, individuals, corporate sponsorships and events. 2012-2013 saw a variety of new opportunities for the community to become involved at the Center. Through the McMillen Health Lecture Series we were able to identify key messages our community wanted to discuss: Finding Food in Farm Country with Ken Meter, MS (July 2012) and Distracted Driving with Miles Nitz, LMFT (April 2013).

The Donor & Champions Breakfast with Biaggi’s Ristorante Italiano was held in July 2012. The 2nd annual Vitality Awards (March 2013) was held at the Landmark Conference Centre. Mac and Pat Parker were honored with the Janus Award. Vitality Award recipients included Mary Pat Leonard, Nancy Mann and Linda Kerr. Their work improves the health and wellness of those throughout our community.

VITALITY AWARD SPONSORS

Bronze:
Fort Wayne Neurological Center
