COVID-19 Announcement

As we enter unprecedented times with COVID-19 throughout the state of Indiana and nation, McMillen Health would like to communicate what we are doing for the health and safety of our staff and program participants. Our goal is to stop the spread of the virus in the communities we serve while protecting the health and safety of our employees and program recipients. We would like to ensure the students we serve continue to receive health education now more than ever as we are in a state of public health emergency.

Effective immediately, scheduled programs have been moved to a digital format. We are working with the school corporations we serve to offer programs in a digital recorded format to be used for E-Learning. Priority will be given to programs scheduled between March 16, 2020-March 27, 2020. If you have a program scheduled during this timeframe, we will be contacting you with the required information to view your scheduled program(s).

McMillen Health will only offer this format of programming during the COVID-19 outbreak. It is not our intent to replace our standard face-to-face or live programming with this program delivery method. E-Learning programs are being offered to schools and teachers so they have the resources necessary to meet their academic standards.

Please understand you are not required to move your method of scheduled programs to E-Learning. You may reschedule your live program at any time by calling 888-240-7268 or (260) 456-4511. Our staff will be working remotely to ensure you continue to receive vital, effective preventive health education as you need it. Schools that do not currently have programs scheduled during this time may also request E-Learning programs. We do have funding available to help offset the cost of programming.

We encourage you to stay informed about COVID-19 by visiting the following sites which are not specific to any region or state as we understand our students reside throughout the globe:

[Center for Disease Control and Prevention Coronavirus \(COVID-19\)](#)

[Johns Hopkins Map – Global Cases of COVID-19](#)

[World Health Organization - Coronavirus](#)

We will continue to evaluate the situation weekly and make necessary changes as new information evolves. We appreciate your continued dedication to health education for students of all ages and abilities.

Nicole Fairchild, MPA, MBA
Executive Director
